

WELCOME TO OUR
Hydrangea
world

SCHROLL®
SCHROLL-FLOWERS.COM

The Story

We started our company SCHROLL in 1998 and have been producing Hydrangeas as our passion ever since. Today we are among Europe's largest producers of Hydrangeas with more than 500.000 m² of production area, own breeding and locations both in Denmark and Portugal.

We keep aiming higher - every day - always to deliver Hydrangeas to the market.

Breeding

In 2007 we started breeding our own varieties of Hydrangea. Today all our varieties come from our breeding department and are produced with passion and care for the environment.

Every year we have new varieties carefully selected and tested before introduced to the market - for better, beautiful and more sustainable varieties.

Our varieties are protected in the European protection program CPVO.

Sustainability

MPS is a worldwide partner of sustainable certificates for the horticultural market. The MPS-A, MPS GAP and MPS SQ certificates ensure our customers the assurance that our products are produced in a transparent production with sustainable quality.

From 2019 we are also certified with MPS SQ, Socially Qualified. This certificate confirms that our products are produced under good and healthy working conditions, including employment, health and safety matters.

Portugal

Hydrangeas cultivated in Portugal are significantly stronger with better quality. These advantages in combination with our production in Denmark, enables us to offer our customers Hydrangea that smells of summer and sunshine.

WELCOME TO OUR HYDRANGEA WORLD

*Yours sincerely
Søren & Carsten Schroll*
